Introducing cloudLibrary

Borrowing and returning items has never been easier!
We are excited to introduce cloudLibrary – the new feature-packed app that makes it easier than ever to borrow, organize, and return your library items.

| **Virtual library card**: never leave your card at home again. Your virtual library card in the cloudLibrary app can do everything your physical card can do – except take up space in your wallet. And the best part? You can load the whole family's cards into cloudLibrary and easily switch between accounts.

| **Mobile checkout**: borrow items on the go. In a hurry? You can now use your smartphone to check out materials from right within the stacks – no standing in line required.

| **Interactive receipts**: say goodbye to lost receipts and cluttered inboxes. cloudLibrary provides you with a digital receipt right within the app. The receipt allows you to view recently borrowed items, favorite items (great for recommending a read to a friend), check due dates, and even get return reminders.

| **My Book Bag**: pack it all up – almost effortlessly. Great for families who check out (and need to return) multiple items at once, My Book Bag is a handy checklist of borrowed materials. Pack it up, check it off, and finally get ALL of your materials returned in one trip.

| **Customize your cloudLibrary**: reading is fun – so is this app. Create your own avatar, choose a theme, and curate notifications, so you get the information *you* want just the way you want it.

cloudLibrary is a free service, available to all library patrons – all you need is your library card. The app is available in the [Apple App Store](#) and [Google Play Store](#). Simply download the app, log in using your library card/pin and start interacting with the library while you are on the go!

Install cloudLibrary today, take the guided tour of features, and find out how easy it can be to manage your library account.
